To John and crew,

We would like to thank you and your crew for an excellent job. You can tell when you hire a contractor that knows his business. After a new garage construction left our yard an eyesore, you quickly came up with the ideas that transformed our yard into one that was aesthetically appealing while retaining the functionality we needed.

We'd also like to say how impressed we were with your work crew. They were very courteous and efficient at all times. It is not often that you see guys like yours who truly care about the quality of work they deliver, true artists in their profession quickly drawing out a landscape design where the yards joined our neighbor's. We very much appreciated the extra effort taken by your crew to please them as well. There was no lost time and we were always asked permission before they moved material closer, or asked if we needed to be let out, etc. No heavy machinery came on our new cement driveway.

Our yard was completed recently July 4th, 2009 in 2 days as promised hard to believe with all the work and materials involved. We have already shown our new yard to friends and highly recommend your company to anyone needing any of the services you provide. They can be sure of top quality materials with work carried out by true professionals and on time!

Thanks again,

Dave and Lorraine Delgaty
